INTERNATIONAL WTA-PRECOM³OS CONFERENCE
PREVENTIVE CONSERVATION

KU LEUVEN

Preventive Conservation

From climate and damage monitoring to a systemic and integrated approach

The concept of Preventive Conservation has successfully introduced the knowledge that "prevention is better than cure" into heritage conservation. The main benefits of this approach are the cost-effectiveness, the improved protection of heritage values, the reduced risk for accumulating deterioration and additional damage, the prolongation of the physical service life of buildings and building parts and the empowerment of local communities in dealing with heritage. Increasingly, arguments rise against reactive treatment patterns, which result too often in postponed interventions, i.e. a high cost of restoration and increasing demand for

funding. Therefore, the WTA-PRECOM³OS conference will focus on preventive conservation approaches, including climate and damage monitoring, and how to implement these monitoring tools within a systemic and integrated approach.

The symposium is jointly organized by WTA-Nederland-Vlaanderen, the Raymond Lemaire International Centre for Conservation (RLICC) and the Civil Engineering Department of KU Leuven, in celebration of the 10th anniversary of the UNESCO Chair on Preventive Conservation, Monitoring and Maintenance of Monuments and Sites (PRECOM³OS).

Invitation and call for papers

Colloquium "Preventive Conservation"

4-5 April 2019, Leuven, Belgium

Abstracts for presentations are to be submitted by 14 December 2018.

The abstract template and submission info can be found on the website:

bwk.kuleuven.be/mat/WTA

Topics

- Climate monitoring and building physics for heritage conservation
- Material deterioration, damage monitoring and condition assessment
- Heritage documentation and related technologies
- Management of World Heritage Sites
- Quality of interventions on built heritage
- The contribution of preventive conservation to sustainable and local development

Target Groups

The International Association for Science and Technology of building Maintenance and Monument Preservation (WTA international) and the Raymond Lemaire International Centre for Conservation (RLICC) promote a strong dialogue between practice, research and education. Therefore, this symposium is targeting professionals, academics, researchers, governmental agencies, and students in architecture, engineering and conservation studies.

Language

The symposium's language is English, specific parallel sessions in Dutch will be provided

Publication

Dutch papers and a selection of full papers will be published in the online proceedings by WTA-NL-VL with ISBN number. A selection of high quality papers will be included in the RLICC book series "Reflections on Cultural Heritage Theories and Practices", which is published by CRC/Balkema and indexed in Elsevier (Scopus).
